OBJECTIVE

I have a solid foundation in Java, SQL, and Computer Networks, which strengthens my understanding of programming, databases, and networking. I'm passionate about exploring how technology works behind the scenes to create high-performing systems. I'm also keenly interested in DevOps. I'm continuously learning to grow my skills in these fields.

PROJECTS

Smart-Transportation-Based-Car-Pooling-System (GitHub Link)

- Developed a system that allows people to share rides, reducing the number of vehicles on the road.
- Focused on creating a sustainable, cost-effective, and environmentally friendly transportation option.
- Aimed at reducing traffic congestion, lowering fuel costs, and decreasing pollution.

Machine Learning Framework for Identifying Alzheimer's Disease

- Built a machine learning model using hippocampal MRI features to detect early signs of Alzheimer's.
- Applied feature analysis and prediction techniques for accurate identification.
- Gained experience in data preprocessing, model training, and evaluation.

CERTIFICATIONS

- **Data Science Using Python** - NSIC July 2023
- **Drone Technology** - CDAC August 2023
